

Prefabricated entry canopies from FasadaPlus instead of plexiglas

Why should you choose FasadaPlus prefabricated entry canopies instead of plexiglas?

+ hassle free usage

Plexiglas roofs are extremely difficult to keep clean. Those close to trees become covered with leaves and get dirty which is not a pleasant look for your home or place of business.

During the summer these roofs cause overheating of the area that they protect.

Entry canopies from **FasadaPlus** don't overheat, are watertight and always stay clean.

+ price and time

Although FasadaPlus entry canopies are slightly more costly than plexiglas, the small price difference is outweighed by their numerous advantages.

No need to hire contractors. Save time with quick installment by a single vendor.
