instead of  
traditional facings ?

## Product comparison

Prefabricated chimney sleeves from FasadaPlus instead of traditional facings

### + endurance and quality

Light, modern structure and high quality materials combined in an affordable system

### + amazing patented invention

The FasadaPlus system is a patented solution that eliminates all problems associated with leaks and cracks in chimneys

### + no problems with snow

Forget the snow build-ups behind the chimney. Eliminate freezing through and leaks.

Take on a durable modern solution – no more temporary do-it-yourself methods.

### + all solutions come from one place

Do not worry about hiring several contractors. We take responsibility for the production, delivery, and installation of the entire system. No more headaches for you.

Before:

After:

### + quick and simple installation

Is your chimney leaking? Do not wait until the spring. We install during all seasons without damaging your old chimney or anything around it.

Our services are fast, simple, and professional.

### + harmony of architecture

The designs of our chimney sleeves fit in with dormers, baywindows and entry canopies to create a clean architectonic line.

We give your architecture a Plus.

### + reduction of renovation costs

Our prefabricated chimney sleeves made in a factory are ready for installation and are fixed on your roof within a few hours. This method of production and installation brings about substantial time savings that are reflected in the affordable price level of FasadaPlus products.
